

INSOLSM PPD

A UNIQUE **Pour Point Depressant**
Especially Formulated for Very Waxy Oils

InSolSM PPD is the result of exhaustive research with waxy oils that are very difficult or expensive to treat with conventional PPD's. It was developed after a thorough, **scientific investigation** on the interactions of wax crystals with each other and with crude oil wax inhibitors.

Product Features

- InSol is based on **field-proven chemistry**
- High active chemical level
- Tested to change wax crystal size
- Effective where conventional formulations fail
- Economical

Typical Properties

- Appearance is **Amber Liquid**
- High flash point, >145 deg. F
- Density, 7.35 lbs/gallon
